K5 FURNITURE SUSTAINABILITY

## A PART OF GLOBAL CHANGE

**WE SUPPORT**

Our philosophy

20 YEARS OF  
THOUGHTFUL  
BUSINESS

K5 FURNITURE SUSTAINABILITY

**WE FOCUS ON  
PEOPLE AND THE  
PLANET.**

# HOW WE CREATE A SUSTAINABLE COMPANY

At K5 Furniture we have always opened our doors and partnered with local and global Sustainable Suppliers. Sustainability is in our DNA.

**Our foundations are based upon Sustainability, Quality & Thoughtfulness. This is part of our mission to improve interior spaces:**

- We donate furniture to our Indigenous educational community as well as Youth Centres.
- We collaborate with brands who mirror our own values and efforts to create an eco-conscious circular business model and align with our views and practices.
- With our key brand partner Kinnarps we have developed systems which focus on a zero-waste target, sustainable material usage, upcycling where possible and if not recycling.
- We look after our people. We ensure they work in a safe & healthy environment that nurtures creativity and productivity. We value cultural diversity.
- All staff are paid above award requirements including holidays, long service leave and time off to support and enjoy the development of their children.

This mission statement imbues every aspect of our company and we continue to pursue leading methods towards our ultimate goal in providing high quality, safe and efficient products to the end user without compromising the health of the planet.

See below the ways in which we are building a better business and aiding global efforts in eco-conservation:

# RAW MATERIALS AND RESOURCES

We use either certified wood or wood from a source we have verified, and risk assessed. Many of our fabrics have environmentally certified credentials. We use recycled metal as much as possible, and mould our own padding, granting us full control over the material. Products made of pure materials contribute to a healthier indoor air quality. Sustainable forestry for better use of the earth's resources, has integrated into our supply chains and materials provenance. We thereby become a part of the customer's sustainable supplier chain.

# THE BETTER EFFECT

Kinnarps AB Group's Sustainability Report 2019

INSTEAD OF SINGLE-USE PACKAGING, WE USE BLANKETS.  
THIS SAVES 270 KG OF PACKAGING PER TRUCK AND  
MAKES IT POSSIBLE TO LOAD MORE PRODUCTS.

# CLIMATE

We are focusing on being more energy-efficient in our own operations and choice of renewable energy sources.

For example - We optimise our transportation - design and routes - to take into account environmental impacts.

Kinnarps' products are loaded like a jigsaw puzzle, without packaging, which enables a load efficiency of 90%. Instead of single-use packaging, we use blankets to wrap our products - blankets which are reused. These are some of the policies we have developed to lessen our impact on the environment.

# REUSE

Good furniture should not become landfill, its design and quality should render it valuable beyond the usually short commercial lifespan. By reusing, refurbishing or renovating a product, we prolong its usefulness. This saves both natural and financial resources. Identifying products that can be used in new design. Certain products can be easily upgraded or refurbished - for example, by replacing tabletops or upholstery. For products which can no longer be used, we offer to responsibly manage and recycle all materials.

# OUR FUNDAMENTALS

- RAW MATERIALS AND RESOURCES
- CLIMATE
- PURE MATERIALS
- REUSE
- SOCIAL RESPONSIBILITY
- ERGONOMICS

**CONSCIOUSLY CREATING DESIGN SPACES AND  
CURATING FURNITURE THAT WORKS TOGETHER  
WITH YOU AND THE ENVIRONMENT**
